

“Outsourcing your IT with FIT is the easiest decision you can make.”

Mason Moore Director of IT • Independent Financial Group

The Challenge

Lack of Internal Team

Competing with Larger Businesses

Access to Enterprise Level Services

Need for Proactive Consulting

The Solution

“As a small business, leveraging an MSP is a great solution. FIT brings together a whole team to help support the needs that even staffing up internally cannot match.

Having FIT as our Enterprise partner means that we have access to high level services that would otherwise cost thousands of dollars to develop and support internally. Many IT companies are reactionary, but FIT really cares that we succeed in our business.”
